SUMMARY

Motivated and continuous learner who has a proven track record of dependability. Passionate software engineer who thrives on implementing cutting-edge, high-impact solutions.

EXPERIENCE

Senior Software Consultant

Sogeti

September 2025 – Present, Remote

- Maintained large master database management systems for our banking client utilizing event-driven microservices to process the records of almost 40 million customers.
- Provided critical support and updates to a legacy Java master database management system.
- Led third party integration and improved throughput on their vehicle financial information systems.

Software Engineer – AI and Machine Learning

DealerOn

May 2025 – September 2025, Remote

- Developed our first AI at scale solutions on Azure with Python and .NET.
- Engineered performant localized AI deployments for image analysis, improvement and extrapolation.
- Utilized cutting edge, fine tuned models and modern deployment and management via Azure Machine Learning Workspaces.

Software Engineer – Retailing, Payments and Personalization

DealerOn

March 2024 – May 2025, Remote

- Developed and maintained critical micro-services using .NET, RabbitMQ, Elasticsearch and Entity Framework.
- Lead developer for integrating and debugging third-party client-side JavaScript integrations for platform add-ons.
- Oversaw application control flow improvements and built dashboards in Grafana for enhanced system monitoring.
- Used ASP.NET and C# to generate HTTP, CSS and JavaScript site code for over a million cards daily to efficiently render vehicles on site.
- Led many performance improvements efforts to save millions of dependency calls daily and to increase throughput, through concurrency, by 30 percent.
- Coached new developers in .NET. Taught object-oriented design principles, dependency injection and NUnit testing framework.

Junior Software Engineer

DealerOn

May 2022 – May 2024, Remote

- Created and maintained RESTful APIs for client configuration using Azure blob storage, SQL and NoSQL via Cosmos Db.
- Built business facing user interfaces with Node using Vue.js, Vuetify and Tailwind for platform configuration.
- Spearheaded the company's adoption of API testing via Postman. Created hundreds of tests to be used in the initial rollout.

Back-End Developer

EmpRes Healthcare

May 2021 – May 2022, Vancouver, WA

- Developed SMS, Slack and ticketing system integrations using RESTful APIs via Python and C#.
- Rebuilt the company portal using React and MongoDB.
- Created .NET LDAP tools for service desk department using PowerShell and C#.

EDUCATION

Bachelors of Science in Mathematics

Minor in Computer Science • Iowa State University • Ames, IA • 2011

Actuarial Exams

Society Of Actuaries Probability Exam

SKILLS

Technologies: C#, .NET, Python, Node, Entity Framework, SQL, NUnit, Typescript, Azure, Vue, Cosmos DB, PowerShell, LDAP, Git, Jest, Linux, Agile

Applications: Visual Studio, Postman, SMSS, Vim, Azure Data Explorer, Rider
